oz news

Looking forward to seeing everyone at EHDI! OZ Systems is proud to be able to contribute to the Parent Place providing us the opportunity to further our passion of helping babies, children and families.

Please visit us in booth **#28**

Out-of-Hospital Births are on the rise. What challenge does this have for EHDI programs?

University of Maryland recently reported in 2017 that 2.43 percent of mothers opt for home delivery or birth centers. This is an increase of 85% since 2004.

OZ Systems' Vital Records Match makes sure all babies born in your state are in *OZ eScreener Plus™* by comparing the patient records to the Vital Records, regardless of where they are born—home or hospital.

Science Daily: Hearing and Deaf Infants Process Information Differently | February 6, 2019

" While there is a growing body of research in preschool and school-age children that provides evidence of differences in cognitive abilities between deaf and hearing children, researchers at The Ohio State University Wexner Medical Center wanted to know when those differences emerge. "

EHDI Testimonial

" OZ Systems reduces human error by transferring patient demographics from the EHR and hearing results from screening equipment into OZ *e*SP. It is hard for our technicians to make mistakes. I depend on it every day for monitoring our program to ensure every baby is screened. We can see if a baby has received follow-up services somewhere else and not have the family return to our hospital for duplicate services. It helps us provide the best care for babies and their caregivers. "
- *Lei Chen, Au.D., CCC/A*

Better Relationships.
Better Care.
Better Outcomes.

OZ Systems is an innovator in global screening solutions, bridging crucial information gaps to ensure quality care and timely interventions for patients and those who care for them. We develop end-to-end newborn screening software that reduces human errors and improves patient safety, quality of care and intervention timeliness. We are recognized for interoperability, and innovation in design and partnerships. OZ Systems has projects with U.S. and international health care providers and public health agencies.
